

Lactaid brand milk carries a calcium enriched version of their whole, 1%, and fat free products. **Milk with added calcium is not WIC allowable.** This may cause participant confusion because the calcium enriched Lactaid milks have a very similar label to the non-calcium, WIC approved Lactaid milks. The calcium enriched milks have a yellow cap and a yellow banner that says calcium enriched. The WIC approved Lactaid milks have a white cap.

WIC Approved Lactaid Milks

NOT WIC Approved Lactaid Milks
