

Vendor Mapping: To scan pre-packaged fresh fruit and vegetables at the cash register, vendors must map all pre-packaged and store packaged produce UPCs to a PLU for the same kind of item.

A list of PLU codes can be found in the “**UPC Information**” section of www.nyswicvendors.com

Do not use the WIC2Go mobile app to scan fresh produce UPCs.

Pre-packaged fresh fruit and vegetables **are allowed** but they will always scan as “Not WIC Approved” with the **WIC2Go mobile app**.
