

Stand Beside Point of Sale (POS) Device

- WIC EBT Contractor assists vendors with stand beside device setup
- EBT Contractor trains vendors by phone
- Supports eWIC transactions only
- WIC items must be rung separately from non-WIC items
- WIC items may need to be scanned twice if the vendor's cash register tracks inventory

Integrated Point of Sale (POS) System

- Vendor's in-house IT or ECR (Electronic Cash Register System) provider trains **store staff** on how to conduct eWIC transactions using the store's specific software
- Training must include processing a void on the store's register system
- Supports multiple payment types, including eWIC
- WIC items and non-WIC items may be rung up together

To be eWIC ready, all WIC vendors' POS must be certified that it can complete an eWIC transaction.

Integrated Point of Sale (POS)

- ✓ NYS WIC staff will contact vendors to schedule an appointment to certify integrated POS devices. The certification will be done remotely (by phone) and is a separate process from the monitoring visit conducted by the vendor management agency (VMA).
- ✓ If multiple stores use the same system on the same server, state staff will only need to certify one of those stores. A store's integrated system will only need to be certified once.
- ✓ Vendors will receive written email confirmation of certification status.
- ✓ NYS WIC recommends that WIC vendors owned by one corporation use integrated registers.
